

## Coronavirus (COVID-19) Touch Surface Decontamination

HazForce Environmental Ltd. is a local, Vancouver Island based Hazmat Company. We are committed to serving the community. Following BC Center for Disease Control (BCCDC) and Public Health Agency of Canada (PHAC) guidelines for Communicable Diseases, we have developed a **Touch Surface Decontamination** protocol to address the novel corona virus (COVID-19). The purpose of this protocol is to offer a service to our clients during this time of extreme concern for health and safety within our community.

HazForce Hazmat Technicians and Management are qualified in Infection Control work as prescribed under CSA Standard Z317.13-17. Our Safe Work Procedures for Hard Surface Decontamination have been developed in cooperation with an Independent Third-Party Environmental Consultant.

We have prepared Specific Packages priced to fit any budget for residential, commercial, and institutional clients on Vancouver Island.

### About COVID-19:

Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus.

Most people infected with the COVID-19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment. Older people, and those with underlying medical problems like cardiovascular disease, diabetes, chronic respiratory disease, and cancer are more likely to develop serious illness.

The COVID-19 virus spreads primarily through droplets of saliva or discharge from the nose when an infected person coughs or sneezes, so it's important that you also practice respiratory etiquette (for example, by coughing into a flexed elbow).

- Respiratory droplets generated when you cough or sneeze
- Close, and prolonged personal contact, such as touching or shaking hands
- Touching surfaces or objects with the virus on it, then touching your mouth, nose or eyes

### COVID-19 Cleanup:

#### **Decontamination, Disinfectant, and Deep-Cleaning:**

HazForce Environmental has the trained personnel and equipment to service multiple client requirements, such as:

- Fleet & Rental Vehicles
- Residential Properties & Businesses
- Care Home Facilities
- Hotel Rooms & Resorts
- International Private Schools

#### **24/7 Pandemic Response:**

HazForce Environmental personnel are available to provide around the clock disinfection services to better suit the needs of our clients and our client's clients.

#### **Hazardous and Infectious Waste Management:**

HazForce Environmental personnel treat and disinfect hazardous and infectious waste properly.

We ensure that all hazardous waste is disposed of at an approved landfill or waste management facility as per the Ministry of Environment regulations.

Help prevent the spread by regularly washing your hands and wiping commonly touched surfaces.

We will do our part by rigorously cleaning all commonly touched hard surfaces where you live and work!

## COVID-19 Touch Surface Decontamination Packages include:

Our crew will set-up temporary decontamination facilities and be outfitted with full personal protective equipment (PPE) during each decontamination. Each respective package includes:

### 30-Day Protocol

An Initial Full-Service Precautionary Decontamination of all Hard Surfaces followed by seven subsequent similar decontaminations.

### 14-Day Protocol

An Initial Full Service Precautionary Hard Surface Decontamination followed by three subsequent similar decontaminations.

### 1-Day Protocol

Full Service Precautionary Hard Surface Decontamination.

Packages include filing of a NOP with WorkSafe BC including a Hazard Risk Assessment and Safe Work Procedures.

## LETTER TO ALL RESIDENTS

You may have noticed our workers wearing Personal Protective Equipment while conducting a precautionary cleaning in the common areas of your building!

We would like to take this opportunity to assure you that we are simply wearing this equipment to protect your safety while we conduct a **Touch Surface Clean** of all the surfaces residents may have contact with daily.

*Thank you, HazForce Management*
